**(**607)262-2557

# **EDUCATION**

#### **Cornell University**

College of Engineering Information Science, MPS Expected Grad. December 2019

#### **Zhejiang University**

Grad. June 2018 Psychology, B.S. Digital Media Technology, Minor Cumulative GPA: 3.65/4.00

# SKILLS

#### Programming Languages:

JavaScript, TypeScript, C/C++, C#, Python, Java, SQL

**Development Skills:** 

HTML5/CSS3, LESS, SASS, ReactJS, VueJS, AngularJS, ExpressJS, jQuery, OpenGL, OpenCV, Three.js Cascade Lab Tools:

Git, Node.js, Elasticsearch, MySQL, Visual Studio

# COURSEWORK

Intro. to Analysis of Algorithms Data Structures Database Systems Computer Graphics Computer Vision User Experience & Software Development Studio

# **ACTIVITIES**

Qiushichao Website Product Manager@ZJU Global Game Jam '18@Shanghai

# EXPERIENCE

#### **Red Hat**

August 2018 - December 2018

Graduate Software developer & UX Specialist

Ithaca, NY

- Implemented web front-end of RedHat's Open Source web project using ReactJS, improved the workflow experience of users filling out security reports and security officers tracking supervision work.
- Collaborated with back-end to build input validation and comment system.

## **Harmony Cloud Technology**

May 2018 - July 2018 Hangzhou, China

Front-end developer Intern

- Extended core features on web front-end, using AngularJS, CSS and visualization library; built REST API with ExpressJS, connecting MySQL and ElasticSearch.
- Refactored front-end with ReactJS and LESS(CSS preprocessor), improving scalability and performance and downsizing UI components code base significantly.

July 2017 - September 2017

Research Intern at University of Illinois Urbana-Champaign Urbana, IL

 Designed and built 2 analytics-driven 3D games using Unity3D in C# to train visuospatial skills; study of 10 participants showing strong correlation between game performance and spatial skills. Built the API for game map, enabling efficient iteration on game modules.

# **PROJECTS**

### **Library for Material Design Button on Vue 2.5**

Created Button component with Material Design Motion (Tweening, Fading, Shared Transformation, etc.).

#### **NewsViz**

Led back-end development of a meme-sourcing mobile Web App to pull out and cluster headline articles from Internet, using Django and ElasticSearch.

#### **MiniSQL**

Led in a team of four to construct relational database management system (RDBMS) using C++. Implemented simplified SQL standard, supporting syntax interpreter, storage buffer and index operations by B+ tree.
